

UT 1 - Calculadora simple

"La función de un buen software es hacer que lo complejo aparente ser simple"

Vamos a crear una calculadora como la que muestra la imagen.

The image shows a screenshot of an Android application titled "Calculadora". The interface is simple and clean. At the top, there is a dark header bar with the Android logo on the left and the title "Calculadora" in white text. Below the header, the main area is white. It contains two input fields for numbers, labeled "Opcion 1:" and "Opcion 2:". Below these fields is a row of four buttons for basic arithmetic operations: addition (+), subtraction (-), multiplication (*), and division (/). At the bottom, there is a label "Resultado:" followed by a large empty space for the result.
